

Question 1: would you want in the 3rd phase of TEQIP paid access to high end experimental facilities in specific institutions?

- High quality of research always require a well established structured lab. Here we found a good research infrastructure. It always require upgrading the facility with the age of development.
- In the 3rd phase of TEQIP we would like to have high experimental facilities in the specific institutes, so that all the TEQIP institutions can avail those facilities.
- To enhance the level of research, TEQIP is very good initiative. I have an idea always which we can implement i.e. about the advanced central research facility in India will be very involved in application field. It may be in the form of the whole research city which is publically open not only limited India but internationally. No boundation or limitations should be their which can limit the research in India.
- Yes , TEQIP is very usefull programme for increase the knowledge of my research in various fields. In this programme, I learnt that the analysis is more important tool for research. TEQIP should be organized quarterly in IIT's.
- For sophicasted instrument like TEM, SHRTM more training should be done.
- I request concession for NON-TEQIP institutions to attend such kind of workshops. Already we have been passing for experiments facilities, request less the charges for Ph.D. scholars.
- Since, there is already a paid facility for access to experimental facilities in almost all the TEQIP affiliated institutes, so now if these institutions provides to the people accessing their facility from other TEQIP affiliated institute then this will definitely help them in many ways.
- I wish to have some type of workshop is provided with some experimental facility to participant so that participant can use all information discussed in lecture can utilize in lab work too.
- I definitely welcome TEQIP paid access to high end experimental facilities in specific institution. However i have slight reservation in this regard. Rather than explicitly finding for experimentation I also would like to suggest that funding simulations in high end computational facilities also would provide as supplement to enhance research quality. I am of the opinion that enhancing simulations research can cut the expenses incorrecr in redundant experimentation. But it will be definitely good to have funding from TEQIP to get access to experimentation.
- As there is paid access already at may IIT, NIT & TEQIP affiliated institutes ; it will be more encouraging if students / scholars from other TEQIP affiliated institutes will be allowed to test a finite number of samples for free of cost & then the charges should be applied at bare minimum limit. This will encourage various institutes to interact on student level also.
- Yes, we could probably have these workshop across the country, to ease accessibility. I also a little clarity regarding TEQIP, as in what/which institutes come under this fold.
- Yes, the paid access to high end experimental facilities in remote specific institution.
- We would like to access high end experimental facilities like XRD, HRTEM, FESEM etc on payment basis.
- I would like to participate in future workshops and conferences organized by TEQIP on advanced analytical technologies for materials characterization and other instrumentation workshops. The experimental facilities database at various institutions may also be prepared & shared so that it may be utilized by researchers.

- Yes we want the further TEQIP session, which is very much guidious to us and help to increase our knowledge and it should be organized regular interval time period.
- Yes, i want paid access of high end experimental facility in your institute because I am working on material sciences so I am not have so much facilities. So we want to join your institute facility to do our research work.
- Yes, definitely the facilities are exceptional in the access centre and I think that would help a lot.
- Yes, we want the 3rd phase of TEQIP paid access to high end experimentation facility in specific institution as it would help a lot.
- Yes it should be here and in all institute to attracting all institute.
- Definitely, we would be very much interested for TEQIP paid access to high end experimental facilities in specific institution.
- Yes, 3rd phase of TEQIP should be paid access to high end experimental facilities should be created in a every region of India.
- Yes we would like access to the above experimental facilities
